

CYRUS UWAOMA

Full-Stack Software Engineer | React / Node.js / MongoDB / REST APIs

Nigeria | +234 814 727 6128 | uwaomacyruz@gmail.com | linkedin.com/in/uwaomacyrus | github.com/CyCodez

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience building responsive, database-driven web applications using HTML, CSS, JavaScript, React, Node.js, Express.js, MongoDB and REST APIs. Combines engineering practice with 4+ years of customer experience and digital product operations at OurPixo, bringing a strong understanding of usability, customer needs, product workflows and business requirements. Holds a Diploma in Frontend Engineering from AltSchool Africa and is currently expanding full-stack engineering expertise through NIIT.

CORE SKILLS

Languages & Frontend: HTML5, CSS3, JavaScript, React, responsive design, component-based UI

Backend: Node.js, Express.js, REST APIs, authentication, server-side business logic

Data & Services: MongoDB, MongoDB Atlas, Firebase, third-party API integration

Tools & Deployment: Git, GitHub, Netlify, Render, Postman

Product & Collaboration: Customer experience, onboarding, support, product feedback, community management

PROFESSIONAL EXPERIENCE

Customer Experience Manager — OurPixo 4+ years

SaaS / Digital Product Environment

- Managed customer onboarding, support and retention workflows for a SaaS product.
- Improved customer experience through proactive engagement, issue resolution and follow-up.
- Led community management, training and product education around software features.
- Collected customer insights and collaborated with product and engineering stakeholders on improvements.
- Managed CRM interactions and handled customer escalations, translating recurring issues into actionable feedback.
- Worked closely with digital product workflows, strengthening a user-first approach to software development.

FULL-STACK ENGINEERING EXPERIENCE

- Built responsive web applications using HTML, CSS, JavaScript and React.
- Developed Node.js and Express.js backend services and REST API endpoints.
- Implemented MongoDB-backed applications, including authentication and database-driven workflows.
- Integrated external REST APIs and services into practical user-facing applications.
- Built NetworkLens, a network intelligence and IP geolocation application using REST APIs and interactive mapping.
- Built BankRecharge — demonstrating authentication, wallet and transaction workflows with native MongoDB.
- Used Git and GitHub for source control and deployed applications through Netlify and Render.

SELECTED PROJECTS

- **NetworkLens** — Network intelligence and IP geolocation application using React, Node.js, Express, REST APIs, Leaflet and OpenStreetMap.
- **BankRecharge** — Full-stack banking-style application using React, Node.js, Express and native MongoDB with authentication, wallet and transaction workflows.
- **Student Management System** — Database-driven academic management system with authentication, student records, results, GPA calculations and administrative workflows.

EDUCATION

- **Diploma in Frontend Engineering** — AltSchool Africa
- **Full-Stack Engineering** — NIIT

Currently expanding backend, API, database and end-to-end application development skills.

ADDITIONAL STRENGTHS

User-first product thinking • Technical problem solving • API integration • Database-driven application development • Responsive UI development • Customer communication • Cross-functional collaboration
